**Smart Solutions for Homes, Corporates & Industries –
Seamlessly from Design to Execution.**

CCTV SURVEILLANCE SYSTEM

Purpose:

Ensure continuous monitoring, enhanced security, and real-time surveillance for corporate and industrial environments.

Industrial / High-rise:

- Centralized monitoring & control rooms
- Integration with access control & alarm systems
- Multi-location surveillance management
- Scalable systems for large premises

LAN AND DATA CENTRE

Purpose:

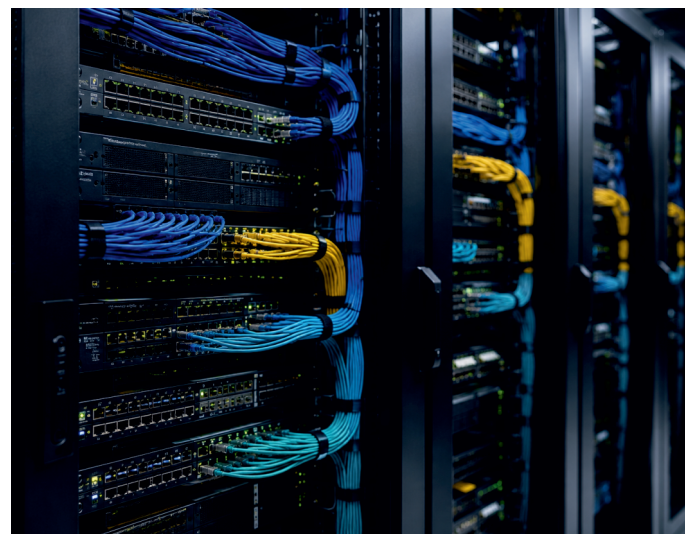

High-speed, reliable data connectivity for corporate and industrial networks.

Key Components:

- Structured cabling (Cat6/Cat6A/Fiber optic backbone)
- Core and access switches (managed, PoE-enabled)
- Patch panels, racks, cable management
- Wi-Fi access points (controller-based/cloud-managed)
- Redundancy & high availability

Industrial / High-rise:

- Fiber backbone for long-distance connectivity
- Surge protection & industrial-grade switches
- VLAN segmentation

EPABX / IP Telephony

Purpose:

Efficient voice communication with modern IP telephony features.

Key Components:

- Cloud or on-premises IP-PBX
- SIP trunk integration
- IP Phones & softphones
- IVR, call routing, analytics
- Intercom communication

Industrial / High-rise:

- Integration with security & emergency systems
- Multi-floor intercom & alarms
- Remote multi-site management

Fire Alarm System (FA)

Purpose:

Ensure life safety and regulatory compliance in corporate and industrial buildings.

Key Components:

- Addressable / conventional fire alarm panels
- Smoke, heat & multi-sensor detectors
- Manual call points, sounders & strobes
- Integration with BMS
- Fire evacuation & alert systems

Industrial / High-rise:

- Multi-zone detection
- Redundant power & networked panels
- Integration with sprinkler, exit & lift systems

INTEGRATION & SMART MANAGEMENT

Unified monitoring dashboards (PSIM / BMS)

Integration of LAN, EPABX, FA, and CCTV

AI analytics for operational insights

Cloud / on-premises management
